Professional Summary

Trained, skilled, and experienced software developer. Well versed with programming languages such as Python, C, and JavaScript. I'm also proficient in SQL, CSS, and HTML. I advance my skills through freelancing gigs and referrals where I write short scripts and help debug codes for my clients over the last one year. I am also working on other projects with other programmers as evidenced on my GitHub account. Currently learning more at ALX and seeking for an entry level position as a software engineer to utilize the knowledge and learn more programming languages. I also have a passion for API and cloud technology and a great listening, communication, and writing skills.

OBJECTIVE

I aim to provide cutting edge engineering solutions and effectively guide developer teams. I hope to work with a company that will offer me a platform to grow as a software engineer who will solve developer problems and execute software tasks from start to finish.

SKILLS

- Over 2 years' experience in python language.
- 1 year+ experience with JavaScript
- Proficient in C, Bash, and Ubuntu operating system
- Proficient with Agile software development principles
- Complex problem solving skills.
- Excellent proficiency with GIT
- Junior experience in python with Django, JavaScript, CSS, and HTML.
- Able to openly propose and defend technical solutions
- Strong collaboration skills and ability to communicate my work with both technical and non-technical peers.
- Skillful in software application development
- Strong analytical skills and great attention to detail
- Proficient in MYSQL database and willing to learn more.
- I can multitask and manage different projects efficiently under a tight time frame.
- Excellent communication and writing skills.

AUSTINE JACK WERE
